The Conference will be held in Gdansk, Poland, on 18th till 21st September 2005 [1]. The Conference's aim is to provide an opportunity for the meeting of scientists and technologists working in the fields of theoretical and experimental physics, technology, development and applications of disordered systems as novel functional materials.

The main topics covered by the conference will be as follows:

- \* Theory of Disordered Systems [2, 3],
- \* Modeling of Structure and Physical Properties,
- \* Amorphous Alloys, Liquids and Melts,
- \* Polymers, Liquid Crystals,
- \* Auxetic Materials,
- \* Nano-materials and Nano-composites.

The conference will take place at Hotel Orle in Gdansk-Sobieszewo. Figure 1 shows the location map.
